

Usmaan Razzaq

New York, NY <https://usmaanrazzaq.design/> usmaan@usmaanrazzaq.design

Product designer (NYC) who owns work from research through shipped product. Sole designer on a peer-to-peer mobile rental app, a nonprofit platform redesign that grew traffic 30%, and ongoing e-commerce product work for a Brooklyn brand. Comfortable in both design and code — Figma, Webflow, Framer, Shopify Liquid.

Experience

Product Designer - Adsum NYC Nov 2025 - Present

Brooklyn-based DTC clothing brand; sole designer working directly with the founder

Designed a custom size-filter feature for Shopify that removed sold-out variants from browse, cutting clicks to unavailable products by 35%

Shipped 26+ e-commerce assets and Shopify UX improvements, including landing pages for collection launches, events, and promotions

Own email campaign design end-to-end (layout, copy, scheduling), achieving a 43.8% open rate vs. ~33% industry average

Lead UI Designer - National Muslim Youth Association Nov 2023 - Nov 2025

National nonprofit serving youth, parents, and educators across the U.S.; Led full platform redesign as sole designer.

Led end-to-end redesign of a failing WordPress platform: proposed and won stakeholder approval for migration to Webflow, then delivered research, design, and build — driving 30% traffic growth and 10–15% more returning visitors within six months

Ran comparative usability testing across 5 focus groups (existing site vs. new prototype); findings directly shaped a department-organized IA that cut paths to critical pages from 5–6 clicks to 2–3

Designed a full-viewport search experience with quicklinks to top pages, and ran a 6-month post-launch survey to drive continued iteration

Built a custom Webflow component library enabling non-designers to make routine updates, removing long-term design dependency

Product Designer - Rented (peer-to-peer rental app) Nov 2023 - Nov 2025

Sole designer taking a mobile P2P rental marketplace from research through engineering handoff

Ran two rounds of comparative usability testing (7 sessions, including 3 returning participants) benchmarking against eBay, Depop, Grailed, and competitor rental apps to define onboarding, browse, and trust patterns

Designed a sub-one-minute onboarding (SSO + single category prompt, no verification wall) positioned between competitors' over- and under-verification — identified in testing as the product's clearest differentiator

Added a "Best Match" browse section in response to Round 1 catalog drop-off; in Round 2, all three returning participants engaged with it first, validating the fix

Delivered a 25–30 screen handoff with component library, annotated flows, and an interactive prototype engineers could test on-device

Founder & Designer - On The Run Studio Mar 2021 - Present

Founded a design studio handling brand identity, UI/UX, and web design/development for clients sourced through referrals and a 5,000+ community built from scratch

Delivered first client engagement (DPR Studio) end-to-end: prototyping, usability testing, and a custom Shopify Liquid theme

Led full end-to-end design and development for the studio's first client, DPR Studio: building the website from scratch, prototyping and testing the design, then developing a custom Shopify Liquid theme for final delivery.

Run a Figma-to-Cursor workflow — core layout decisions in Figma, refinements directly in code — to compress the design-to-dev cycle

Skills

Design: Figma, Prototyping, Wireframing, Design Systems, Usability Testing, Interaction Design, Responsive Web Design

Development: JavaScript, HTML/CSS, Shopify Liquid, Webflow, Framer, WordPress, Vercel, GitHub

AI workflow: Cursor, Claude Code, Codex

Research: User interviews, focus groups, comparative usability testing, survey design & synthesis

Education

AS, Multimedia Design & Programming — Borough of Manhattan Community College | Dec 2025

UX/UI Design Certificate — DesignLab | 2023–2024

Front-End Development — Codecademy | 2024–Present
