New York, NY · usmaanrazzaq.design · linkedin.com/in/usmaan-razzaq · usmaan@usmaanrazzaq.design · (347) 987-7908

Product designer with 3+ years of product and digital design experience, owning work from research through shipped product. Sole designer on e-commerce product work for a Brooklyn-based brand, a nonprofit platform redesign that grew traffic 30%, and a peer-to-peer rental app taken through engineering handoff.

EXPERIENCE

Product Designer — Adsum NYC

Nov 2025 – Present

Brooklyn-based DTC clothing brand with 20k+ monthly; sole designer, working directly with the founder

- Designed a custom Shopify size filter that removed sold-out variants from browse, cutting clicks to unavailable products by 35%
- Shipped 26+ e-commerce assets and Shopify UX improvements, including landing pages for collection launches, events, and promotions
- Owned email campaigns end-to-end (layout, copy, scheduling), hitting a 43.8% open rate vs. ~33% industry average

Product Designer — National Muslim Youth Association

Nov 2023 – Nov 2025

National nonprofit serving youth, parents, and educators; sole designer on a full platform redesign

- Led the redesign of a failing WordPress platform: proposed and won the move to Webflow, then delivered research, design, and build. 30% traffic growth and 10–15% more returning visitors within six months
- Ran comparative usability testing across 5 focus groups (live site vs. new prototype); findings shaped a department-organized IA that cut paths to critical pages from 5–6 clicks to 2–3
- Designed a full-viewport search experience with quicklinks, then ran a 6-month post-launch survey to keep iterating
- Built a Webflow component library so non-designers could make routine updates without a designer on call

Product Designer — Rented

Nov 2024 – Feb 2025

Peer-to-peer rental marketplace; sole designer with founders and engineers, research through prototype and handoff

- Ran 2 rounds of comparative usability testing (7 moderated sessions) against eBay, Depop, Grailed, and rental competitors; findings shaped onboarding, discovery, and trust
- Designed a sub-60-second onboarding flow that cut onboarding time 42% across prototype iterations; all 7 participants completed it in the final test
- Introduced a personalized Best Match discovery feed; every returning participant in Round 2 used it first
- Delivered 30+ production-ready mobile screens, an interactive prototype, a reusable component library, and annotated specs for engineering

Founder & Designer — On The Run Studio

Mar 2021 – Aug 2026

Design studio for brand identity, UI/UX, and web; clients from referrals and a 5,000+ online design community built from scratch

- Delivered the first client engagement (DPR Studio) end-to-end: prototype, usability testing, and a custom Shopify Liquid theme
- Run a Figma-to-Cursor workflow (core layout in Figma, refinements in code) to compress the design-to-dev cycle

SKILLS

Product Design UX/UI, end-to-end product design, interaction design, mobile design, e-commerce UX, information architecture, design systems, rapid prototyping, engineering handoff, cross-functional collaboration

Research User interviews, usability testing, comparative usability testing, focus groups, survey design, research synthesis

Tools Figma, Webflow, Framer, Shopify Liquid, HTML/CSS, JavaScript, GitHub

AI workflow Cursor, Claude Code, Codex, v0

EDUCATION

BFA, Design — Queens College

AS, Multimedia Design & Programming — BMCC

UX/UI Design Certificate — DesignLab

Graduated 2025

2023 – 2024
